

Simple Averaging

Combines LR, XGBoost, Gradient Boosting with equal weights.

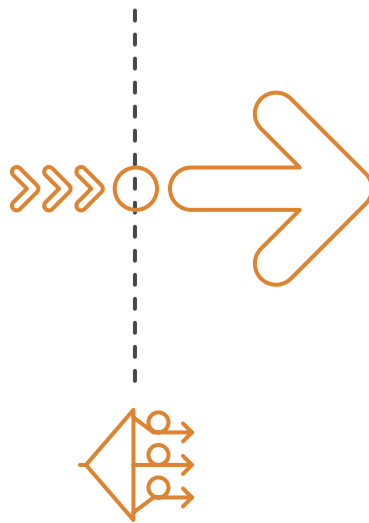

Weighted Averaging

RMSE-inverse weights applied to base models.

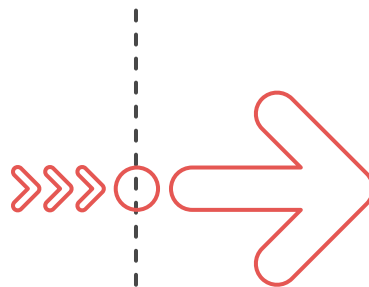

Voting Regressor

sklearn VotingRegressor with equal weights.

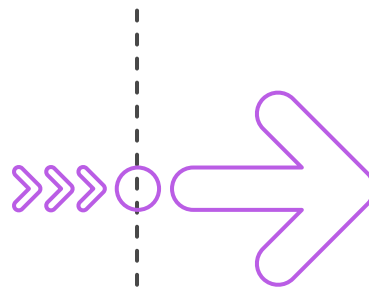

Stacking

Ridge meta-learner trained on out-of-fold predictions from 5-fold cross-validation.

XGB-LSTM Hybrid

XGBoost extracts trend, LSTM models residuals.

Blending

Ridge meta-learner trained on 20% holdout set predictions.
